

## **Elekta included in Dow Jones Sustainability Index**

STOCKHOLM, Sweden, September 18 – Elekta has been recognized as one of Europe's most sustainable companies by the Dow Jones Sustainability Indices (DJSI), a prestigious global sustainability listing.

The DJSI has included Elekta on its Dow Jones Sustainability Europe Index in the Health Care Equipment & Services group. Companies included in the DJSI are assessed according to certain economic, environmental and social parameters.

“We are very proud that our work is recognized for its sustainability,” says Brittmarie Djurle, Elekta's Global Vice President, Corporate Social Responsibility & Risk Management. “That we have been included in the index encourages us to continue our efforts and become even better.”

The DJSI is based on an in-depth analysis of financially material economic, environmental and social practices. These include innovation or supply chain management, climate strategy and stakeholder engagement and places a special focus on industry-specific risks and opportunities.

Launched in 1999, the Dow Jones Sustainability Indices are the first global indices to track the financial performance of sustainability-driven companies worldwide.
