

PRESS RELEASE

Stockholm, March 30, 2004

ELEKTA RECEIVES NOTIFICATION THAT THE U.S. SUPREME COURT DENIES OPPONENT'S PETITION IN PATENT DISPUTE

As previously announced, Medical Instrumentation and Diagnostics Corporation (Midco), Elekta's opponent in the U.S. patent dispute, in January filed a petition for a writ of certiorari with the United States Supreme Court. The petition requested the Supreme Court to review of the Federal Circuit's judgment vacating the prior judgment of the District Court in this case and absolving Elekta of all liability.

On March 29, the United States Supreme Court issued its decision denying MIDCO's petition for a writ of certiorari.

Following the Federal Circuit's judgment in favor of Elekta, MIDCO has recently also filed a motion to amend its complaint in the District Court and requested that it be allowed to amend its case to be based on different claims of the patents in question. Elekta has opposed MIDCO's motion. Elekta believes that it is unlikely that MIDCO could prevail under any of the claims of the patents.
